

SUBWAY CAR

EASY to transport- EASY to light- EASY to shoot

THE RADFORD STUDIO CENTER **SUBWAY CAR** IS ALL THAT AND MORE

TWO TRAILER SECTIONS

The mock up is built in two trailer sections. CAR A and CAR B can be rented as a complete set or individually.

TRANSPORT

To transport the subway car, you need to provide a stake bed truck with a hitch and a **WIDE LOAD PERMIT**.

SHOOTING

On the **WILD SIDE** — side walls, ceiling section, and center posts are wild to accommodate any desired angle or shot.

MOTION EFFECTS

It is easy to create motion effects as each half of the subway car rests on leaf spring supported wheels.

THE INTERIOR

The subway car is equipped with dimmable fluorescent ceiling fixtures and accent lighting.

THE DOORS

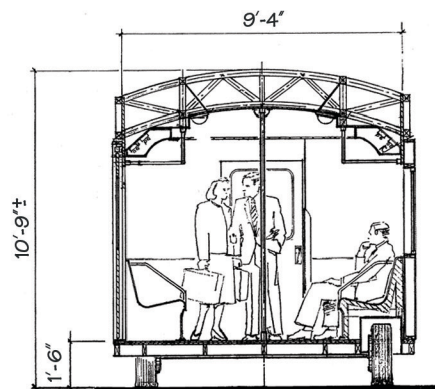

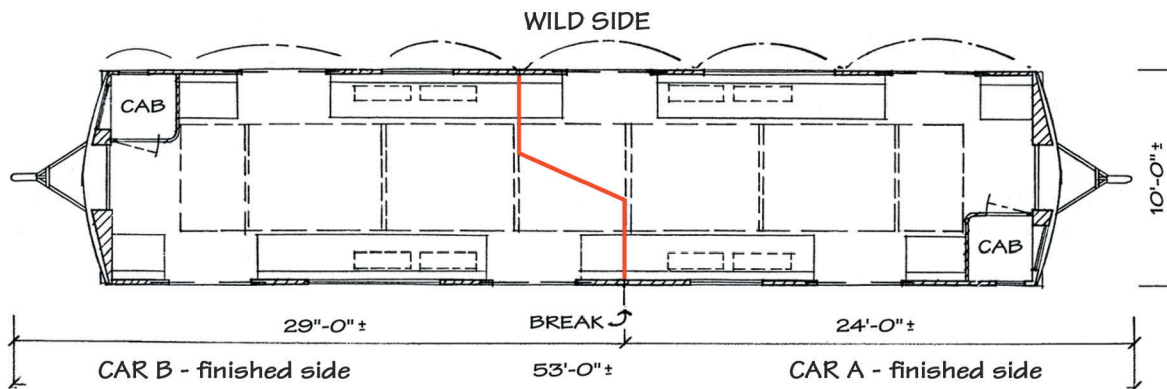

The side doors are designed to operate from house air.

*Modifications may be made to the subway car if previously agreed upon by the studio, Lessee will bear all costs of returning the **SUBWAY CAR** to it's original condition.*
